FARINACEOUS AND DIETETIC PREPARATIONS.

AS aids to Medical treatment and the rearing of Children, articles of Diet deservedly command a large share of attention, and this is especially so in India, where the exhausting effects of the climate render their use an absolute necessity. Amongst those which have attracted recent attention are :—

PREPARATIONS OF MALT.

The addition of Malt Flour to the food of Infants and Patients with impaired digestion is due to the suggestion of the late Baron Von Liebig, and there is no doubt that many of the slighter disorders of infancy may be avoided by following the system of Diet he recommended. *Savory and Moore's, Liebig's Food, and Mellin's Food for Infants and Invalids* are amongst the best of Malt preparations.

Undernoted are a few of the *Dietetic preparations* kept in stock, and, as *consignments* are received by each *fortnightly* mail direct from the makers, their *genuineness* and *freshness* may be *relied upon.*

COMMERCIAL INTELLIGENCE

SATURDAY EVENING, JUNE 4.

OWING to the Whitsuntide holidays the home markets are closed from to-day until Tuesday next inclusive, and the latest telegraphic advices are accordingly the closing telegrams of yesterday.

Consols were again quoted at 100⅜, French Rentes at 119¾, Enfaced Rupee Paper at 85 for Fours and 91½ for Fours-and-a-half, the 3½ per cent. Indian sterling Loan at 103 ex Coupon.

Coffee and Cocoanut Oil come unchanged; Linseed and Rapeseed quiet, and partially 6d. per quarter lower.

Piece-Goods in Manchester continue firm at previous prices, except for Twist, which is quoted ⅛d. per lb. higher. The shipments from the U. K. for India during the month of May, as reported by by Reuter, give full supplies of all kinds again both for Calcutta and Bombay, and it almost seems as if the markets on this side were not to be allowed the chance of recovering from their existing depression.

The Liverpool Cotton market, although firm and 1-16d. higher in Americans both on the spot and to arrive, was not so active yesterday as on the previous day, the sales only reaching 12,000 bales, of which but 600 were Surats. In Bombay descriptions no change is reported either in the public or private messages, any little demand there is being for fine qualities, which are not now to be had here. In New York yesterday ready Mid-Uplands advanced from 11 to 11 1-16 cents, but September shipment on the other hand has declined 13 points at 10·67 cents. per lb.

The usual weekly comparison of the statistical position will be found below. During the week the Liverpool Stock has decreased by 29,000 and the total supply for all Europe by 90,600 bales, but both items still show a large excess over previous years, and it is difficult to see good grounds for higher prices unless possibly a corner be attempted again for September delivery of Mid-Americans or bad reports are received regarding the growing crop.

The American crop figures to date give the following comparisons with the two previous years :—

	1881.	1880.	1879.
Week's Receipts	32,000	21,000	12,500
,, Exports to U. K.	39,000	55,000	14,000
,, ,, to Continent..	30,000	17,000	1,000
Total receipts since 1st Sept....	5,520,400	5,754,600	4,389,500
,, Exports to U. K. ,, ...	2,489,600	2,302,000	1,948,700
,, ,, to Continent ,, ...	1,631,700	1,201,900	1,369,100
,, Stock in the Ports.....	463,000	390,000	217,000

The total visible supply of cotton for all Europe on the 3rd instant compares as follows with the two previous years :—

	1881.	1880.	1879.
Total supply of all kinds ..	2,740,000	2,347,340	1,770,530
,, ,, ,, Surats.....	545,000	360,810	457,020

For the U. K. only the figures are :—

Stock in Liverpool	902,000	775,540	597,480
,, London	47,000	41,510	41,220
American Afloat	150,000	211,000	135,000
E. Indian ,, ...	112,000	181,000	178,000
	1,211,000	1,212,050	952,700
Price of Mid-Uplands	6⅞d.	6 11-16d.	5 9-16d.
,, Fair Dholleras	4¼d.	4 15-16d.	5 9-16d.
Difference..	2d.	1¾d.	1¾d

EXCHANGE.—The market opened steady, and to begin with the Banks were scarcely so willing buyers as at the close yesterday. Accounts from Calcutta, however, coming weaker, a decline of 1-32nd, to 1-16d. was established, at which the market closed still tending downwards. Closing rates are :—

Bank Bills on demand.....	Is. 7 11-16d.	per rupee.
Do. telegraphic	Is. 7 21-32d.	,,
Do. 3 months' sight is.	7 25-32d.	,,
Credits, 3 ,, ,, ..	Is. 7 29-32d.	,,
Documents, 3 ,, ,, ..	Is. 7 15-16d.	,,
Francs, 3 ,, ,, ..	2·09⅛f. to 1c.	,,

On Calcutta we quote demand drafts at par to 1-16 per cent. premium, 60 days' sight 7-16 per cent. discount.

GOVERNMENT Paper continues very firm at Rs. 104¼ for Fours and Rs. 111⅛ for Fours-and-a-half.

SHARES are firm, but with no changes worthy of particular notice.

COTTON has been easier than yesterday by Re. 1 to Rs. 2 per candy for everything except Good Dhollera, which is scarce and in request at Rs. 186 for well up selection. Supplies are liberal, and large stocks are being put into store to hold over the rains. At the present moment the stock is probably over 150,000 bales.

WHEAT and SEEDS are unaltered.

FREIGHTS are quiet but pretty firm. For Liverpool by steam we quote 40s. ready, 37s. 6d. shipment in a week, sail 45s. ready, 40s. shipment in ten days. For other ports there is no alteration.

PIECE GOODS are quiet at unaltered values. The heavy shipments advised from home during last month, leave little hope of any marked improvement in values, even with all the aid of a favorable monsoon as supplies are kept up on a scale equal to our fullest possible requirements.

COALS are dull at previous prices, no new business being reported.

The Bombay Gazette

MONDAY, JUNE 6, 1881.

WE find that the experimental process of lessening the cost of jail maintenance by reducing the food of the prisoners to the very lowest rate which will suffice to keep body and soul together has been much more general than we at first thought. Our attention was attracted to this subject by a statement in the last Bengal Jails Report that the cost of feeding each individual prisoner had been reduced in 1879-80 to Rs. 26-7-9 per head, for the whole twelve months, from Rs. 31-10, the average cost of the previous year. The amount appeared a very small one—a little over two rupees a month for each man or woman; and on looking further into the report, we found it was indeed plainly far too small, as was evidenced by the statistics of sickness and mortality in the Bengal jails during the period under review. After commenting on the Bengal report, we found that a similar state of things had set in as early as 1878-79 in the North-West Provinces. And now we have received the Report on the Jails of the Central Provinces for the year 1880, and have been surprised to find that the cost of feeding a prisoner in a Central Provinces jail has been "economised"—we believe that is the term adopted by the prison and Governmental authorities—below even that of Bengal. The rations rate of the prisoners confined in the Central Provinces jails in 1880 was Rs. 21-0-8, a reduction of Rs. 4-13-1 per head having been effected on the amount allowed in the previous year. And apparently still further economy is anticipated, as we are told the "reduced dietary scale" has not yet been adopted in all the jails. It is significant to notice on one page that "the largest decrease under the head Rations has occurred at the two central jails of Nagpur and Jubbulpore," and on another that "deaths increased considerably, in Nagpur from 27 to 47, in Jubbulpore from 56 to 78," and again that "the diseases which caused most deaths were dysentery and diarrhœa," and "the death-rate at Nagpur and Jubbulpore was also swollen by deaths from anæmic and general debility." In the case of one jail, the medical officer in charge writes : "On assuming charge late in the year, I noticed the poor physique and under-fed look of several of the prisoners, and the men complained of insufficient food." This doctor happened to be one whose views, as he put it, were "opposed to those of medical officers who have expressed themselves in favour of the reduced scale," and he succeeded in getting the prisoners at the jail he was in charge of allowed a little more food, with the result that they improved greatly in health. He reports that "irritable unhealthy ulcers that did not seem improved by medical treatment at once took a healthy action when increased diet was given." The views of this gentleman, we think, are deserving of more attention than they appear to receive at the hands of the authorities of the Central Provinces. The Chief Commissioner, commenting upon the Report of the Inspector-General of Prisons, has a good deal to say on the question of sickness and mortality in the jails, but he ignores the points raised as to the responsibility of the undue straining after economy in this direction. He cites seven causes of ill-health—over-crowding, bad ventilation, bad conservancy, bad drainage, insufficiency of clothing, sleeping on the ground, and deficiency of personal cleanliness; but leaves out the most prolific cause of all, insufficient food. There is throughout the report an evident straining after economising to the very last pie. We are told of one case where the line was drawn so fine that when, "from some misconception of the orders on the subject, the staple article of the prisoners' food had been reduced by four instead of by two chittacks," the health of the prisoners suffered so seriously that the medical officer was obliged to protest. The Superintendent of the Nagpur jail reports :—The occurrence of cases of non-inflammatory suppurating corniti's, a disease seen only in unhealthy, underfed individuals, led me strongly to suspect irregularities in regard to the issue of rations. I found, however, no evidence to support the suspicion." Evidently, it was not a matter of irregularity in distribution, so much as that the food when distributed was insufficient to maintain the vital functions. We decidedly think a great mistake is being made in regard to this reduced dietary scale. Beyond the inhumanity of the thing, as evidenced by the numbers who die in confinement, there is the question of how many of those who are able to pull through with their lives are discharged from custody in such a state that they are unfit for work, and must either beg or steal if they would live.

THE papers received by the present mail state that Mr. Henry Labouchere has given notice of an intention to put a few questions as to the share, if any, which Lord Lytton had in furthering Major Butler's adventure to the Turcoman frontier. This is satisfactory. But it would be better still—it would cause infinitely more amusement than the walking-stick and umbrella trial, and in fact be remembered as one of the most curious political

TELEGRAMS.

CONTEMPLATED CHANGES IN THE P. W. D.

(FROM OUR OWN CORRESPONDENT.)

CALCUTTA, JUNE 5.

The *Englishman* states that the following changes are contemplated in the Public Works Department:—The introduction of a class of sub-engineers, intermediate between the present engineer and the upper subordinates to be called clerks of work. The new class will consist of five grades besides one of apprentices; salaries ranging from one hundred to six hundred rupees. This class will be raised exclusively in India as much as possible from natives educated in the engineering collages. No assistant engineer should be over thirty-two years of age. The fifty-five years rules to be extended to civil as to royal engineers. There will be a limitation of admissions from England. The proposed changes will not be enforced until the present excess engineers are absorbed. The result reduces the ratio assistant to executive from four to three to two to three.

The *Times of India* has such special means of information at its command that it should be above twitting us with the "broad and comprehensive ignorance" we display. Our contemporary has been able, within the last ten days, to inform the public (1) of an offer of the Governorship of Madras—which had not been made; (2) of an acquittal of Hyat Khan—which had not taken place; and (3) of the way in which a horse won the City and Suburban—some twenty-four hours before he lost it. We cannot imitate omniscience of this sort; but we admire it, and think, as we say, that it might safely be left to point its own moral.

The French Geographical Society has conferred one of its four gold medals on Captain Gill, R.E.

Lady Ripon has become the patroness of the Calcutta Society for the Prevention of Cruelty to Animals.

Cattle disease is still reported as prevalent in the majority of districts in the Central Provinces, where the weather has been very close and hot, but cholera and small-pox are decreasing.

In consequence of Dr. Leitner's absence on leave, Mr. Sime will act as Principal of the Lahore Government College.

General Pollard has been telegraphed to go down at once to Lahore, with a view to investigating the accident to the new reservoir.

"Great excitement," we are told, "prevails at Foochow amongst the Chinese owing to the finding of very rich gold fields, about twenty miles up the river from the foreign settlement."

Nawab Ahsunoolla, of Dacca, gave a ball to celebrate the occasion of the Queen's birth-day.

For the week ending the 28th May, the mean temperature in Calcutta was 83·5, as against 86·7, the mean average temperature of the same period for the preceding 24 years.

The Rifle Brigade returned to Rawul Pindee on the morning of the 1st instant from the Waziri Expedition, having travelled by railway from Kooshalgurh.

A contemporary states that there is no intention of making over Chaman to the Ameer's troops. Even if the garrison be withdrawn to the entrenched camp on the Khojak, Chaman Fort will still be garrisoned either by irregulars or by a small detachment.

Another shooting accident is reported from Rajputana. A week ago, Lieutenant Clements, Adjutant of the Erinpura Irregular Force, went out to shoot the "ever-angry bears". One of them looked so formidable that the carrier of the unfortunate sportsman's spare gun lost his head and fired, sending a Martini-Henry bullet crashing through his master's tibia and fibula.

The *Indian Agriculturist* says a small consignment of two tons of Egyptian cotton has been brought by the P. and O. s. s. Mirzapore. As it is a very fine, soft, and long staple cotton, it has been procured by one of the spinning companies in Madras, as an experiment, to see if it is possible to spin the finer and more expensive descriptions of yarn, which at present have to be obtained from England.

The Bengal Chamber of Commerce, at the half-yearly meeting on Tuesday last, elected Mr. A. B. Inglis President, in the place of Mr. W. E. Crum, Mr. G. H. A. Morrison being at the same time chosen a Vice-President.

The following is the result of the opium sale held at the Government sale-room, Calcutta, on the 1st instant:—

	Chests.	Highest.	Lowest.	Average.	Proceeds.
Behar	2,350	1,305	1,295	1,297 15-9	30,50,375
Benares	2,350	1,235	1,230	1,230-9-0	28,91,825

Judged by statistics, remarks the *Englishman*, the police of Calcutta seem to have worked remarkably well during the past year. Not only have they been fairly successful in the detection of crime, but serious crime itself shows a marked diminution, for which it is only fair to give them a share of the credit. At the same time there was a large falling off in the number of arrests made for street offences under the Police Act, which dropped from 4,704 to 3,550, and though some persons might be inclined to regard this as an indication of diminished vigilance on the part of the police, we are rather disposed to look upon it as a sign of increased honesty. Of the 3,550 persons arrested for street offences, 2,483 were convicted.

It is stated that, under instructions from the Horse Guards, all Captains of the Royal Engineers, not yet qualified for promotion, are to be informed that it is very desirable they should pass the required examination at the earliest opportunity after they have completed the requisite service.

The *Madras Mail* has conceived a new idea on the question of the Madras Governorship. "General Sir Frederick Roberts, Bart, G.C.B., will arrive in Madras in October. He has written out for a large house at Ootacamund, where his children and their governess will permanently reside. Since he did so, the Madras Governorship has become vacant, and it seems to us highly probable—as the Madras Commander-in-Chiefship is doomed—that Her Majesty's Government will appoint Sir Frederick Roberts to succeed Mr. Adam."

It is not intended, we *(Pioneer)* believe, that officers on the Staff shall be allowed to follow up their five years' tour of service by a second term, and as a result of this several officers revert to regimental duty. Certain postings have already been made, among which we may mention the following:—Major Morris, late Brigade-Major of Cavalry at Kandahar, to the Bengal Cavalry; Major Halliday from Calcutta to the 15th Bengal Cavalry; and Major Shakespear, D.A.A.G., Simla (on completion of his tour, on the 1st of December next), to the 12th Bengal Cavalry.

On Tuesday evening, Brigadier-General Cobbe, attended by his Brigade Major and D.A.A.G., inspected the Fort, Lahore, and examined the scene of the late robbery. One of the guard implicated in the theft has confessed to his share in the transaction, and Rs. 602 have been discovered in the drain from Meean Meer at a spot pointed out by him. There is also an inclination among the other men of the guard to talk, and it is hoped that more of the money may be recovered; but as it has evidently been stolen in driblets and divided as stolen, the police are not over sanguine about recovering very much of it.

Maharajah Adiraj of Nepaul had been ill for some time before he died, and dangerously ill since the beginning of April last. The Nepaul authorities were quite aware of what might happen, and the strongest precautions had been taken to maintain public order in the event of the sovereign's decease. So far, we believe, all has gone well; but Sir Runoda Singh, the Mayor of the Palace, will have enough to do to keep things straight. Before now, in Nepaul, far stronger and abler ministers have been overthrown by their rivals.

Gaya, in Bengal, must be a nice place to live in! The district weather report for the week ended the 28th May states:—"Weather comparatively cool, as rain has fallen. Maximum reading of thermometer in shade 110·3." It would be interesting to know what temperature the good people of Gaya consider comparatively hot. Throughout nearly all parts of Bengal there was good rain during the week, though more would be beneficial in parts of Birbhum, Bhagalpur, and Lohardaga.

The Calcutta people have been on a short allowance of water. "As many complaints from the public are reaching the Water Works office, the *Englishman* has been asked to explain that the cause of the extraordinary want of water pressure in the south division of the Town during the past few days is the breakdown of one of the engines at the Wellington Square Pumping Station. We are sorry to have to add that the inconvenience will continue about three weeks longer, until the necessary repairs can be effected." Pleasant, at this time of the year.

The story of the visit of envoys from Kabul to the Waziris, the *Pioneer* says, has this foundation of truth in it, namely, that Major Macaulay, the Political Officer with General Kennedy, knew that two men were representing the Ameer with the Mahsuds, and it was believed that their mission was to counsel submission. The Ameer was told weeks ago that his intercession for the tribe could not be listened to, as they had drawn punishment upon themselves. It is very unlikely that the Mahsuds will acknowledge themselves subjects of the Ameer after his refusal to aid them. The Kabul envoys have probably been told so by the chiefs.

The *Bangalore Post* "is enabled, on the authority of a private telegram just received from Scotland, to announce the termination of the Robertson-Smith case. The message contains the one significant word, 'excluded,' which leaves it undetermined whether the 'heretical' Professor has merely been deprived of his chair in the Aberdeen College, or has been declared no longer a minister of the Free Church of Scotland. In either case, the principle is the same; and the decision marks an important epoch in the history of the development of religious thought within the Presbyterian churches."

Professor and Madame Ujfalvy leave Simla to-day for Kashmir, travelling by way of Kangra and the basin of the Upper Indus. The *Pioneer* gives them the following encouragement:—"These distinguished wanderers, who are the guests of Sir Robert Egerton at Simla, do not seem to appreciate the difficulties of travel when once the beaten track has been passed. In crossing into Kashgar or the independent khanates which border Kashmir the only chance of success lies in a thorough knowledge of the language and customs of the half-savage races which have to be met and pacified, and in this respect M. Ujfalvy is quite helpless. He does not know Persian or Turki, and will have to trust to native interpreters which means that he will be mobbed at every step of his wanderings, and will in all probability be subjected to much hardship and perhaps to great indignities. To attempt to penetrate into Wakhan from Gilgit would be to commit suicide, and in his progress towards Yarkand he will probably have to pay heavy black-mail to robber Kirgiz tribes, who may even then strip him of his baggage, and turn him adrift to die. We do not say this to discourage the Paris ethnologist, but to warn him that travelling in lawless countries requires large experience, great tact, and greater linguistic abilities."

Madras proposes and a sensible memorial of the late Governor. The local *Mail* writes:—"For some little time before his death, the late Right Hon'ble W. P. Adam, the Governor of this Presidency had under his consideration an elaborate scheme for the improvement of the City of Madras. A scheme was proposed, which embraced all the Fort Esplanades, the Island, Government House grounds, and Chepauk. The Fort ramparts were to be swept away, leaving the buildings now enclosed by them open to the sea breeze, and thereby contributing largely to the comfort and health of the garrison. The materials of the revetments were to be utilised for various purposes connected with the harbour, but chiefly to stop the encroachments of the sea. The ground around the Fort being levelled and the moat filled, the locality would then be planted as a park. The Island was to remain available for military purposes, but it was to be much improved by the planting of trees: and Government House grounds and Chepauk were also to be laid out park-fashion, the avenues of trees and straight roads being replaced by pleasant sweeping drives, with clumps of foliage, open grass glades, and choice trees interspersed. Then it was proposed to have a double avenue of trees, and a ride, along the beach from the Fort to the Ice House. It was suggested that the carrying out of this scheme might be spread over several years, and it was hoped that the Madras public would be ready to contribute liberally towards its execution. The plan took Mr. Adam's fancy, and had he been spared he would, we believe, have made it his special business to enlist the support of the Government and the public in carrying it through. It is now suggested that it would be a graceful tribute to his memory to take the scheme in hand, and to arrange for the creation of what might be appropriately called, 'The Adam Park.'"

Mr. Parnell's notice of motion against thet Irish Land Bill was in the following terms:—

"That in the opinion of this House the Bill in its present shape will fail to secure the tenant-farmers of Ireland such a reduction of their rentsas to afford adequate protection for the property in their holdings acknowledged by the Act of 1870 to belong to the occupying tenant whilst it leaves tenants evicted, or threatened with eviction, or unable to pay rack rents in a defenceless condition. Further that the provisions of the measure afford no suitable guarantee that its operation will result in the establishment of a sufficient number of occupying owners to check the monopoly of land at present existing, or to make available for the employment or support of the labouring population of Ireland the large area of cleared land from which the former occupying tenants were evicted and whose property in the soil was forcibly and fraudulently appropriated by the landords without any compensation."

In addition to these reasons for regarding the Land Bill as inadequate the vote of censure moved on Friday would refer, of course, also to the Coercion Policy and particularly the recent action of the Executive in arresting Mr. Dillon, and following that up by the arrest of Mr. Kettle, who was, with Mr. Sexton, appointed "Chief Organizer o' the Land League, when Mr. Dillon was thrown into jail.

The *Pall Mall Gazette* considers that it may be useful at the present juncture to call to mind a few figures relating to the trade between Great Britain and France. Lying contiguous to each other as they do, these countries have always done considerable trade together, but not so much as they might have done had the free flow of trade intercourse been unchecked by tariffs. Previous to 1860 our total exports to and imports from France ranged between £10,000,000 and £12,000,000 in value; the exports, including foreign and colonial produce, transhipped from England, as well as British and Irish manufactures. After Mr. Cobden's treaty came into force, the exports to and the imports from France took a great start forward, and the year or two may be said to have been side by side. Soon, however, our imports from France began to outstrip our exports thither; and from 1862 down to the present time, with the solitary exception of the year 1871, we have always bought more from France than we sold to her. Latterly, the excess against us on the trading account has generally been from £10,000,000 to £12,000,000; but if we exclude the transhipments of foreign and colonial produce, it has been from the first much more. Our sale of British manufactures to France has been declining for years. The complete returns for 1880 are not yet published, but the total for 1879 was under £15,000,000, against imports from the same to the the value £38,500,000. In 1871—an exceptional year—we sent France upwards of £18,000,000 worth of our goods. That was the high-water mark, the largest total since being £17,300,000. Our imports from France have been as high as £46,700,000, the figures reached in 1875. These totals show how much more France gained than we did by their partial adoption of free trade twenty odd years ago.

THE BEGINNING OF THE END AT MAHABLESHWAR.

(FROM OUR OWN CORRESPONDENT.)

JUNE 3.

We dwellers in Elysium have to thank the clerk of the weather—"strictly in words" as Mark Twain says—for having provided us with a brand new and early monsoon. "An abundance of water is a great blessing," so says your Matheran correspondent in his letter which appears in this morning's *Bombay Gazette*. Yes, quite true; but then one must draw the line somewhere. For the last three or four days we have had rather too much of it, and people begin to growl and grumble when confined to the house for two or three days together.

Dinner parties and dances are still in full swing, but it is rather dangerous work going to and returning from these entertainments, for the feeble rays of the carriage lamps cannot penetrate more than a foot-and-a-half or so of the dense mists which come driving up the khuds, completely enveloping the mountain. The other night when returning from a friend's house a series of adventures befel me, and after driving slowly for twenty minutes the half-drowned and shivering coachman found himself at the place from whence he had started. A fresh start was made, and I reached home in an hour and twenty minutes altogether, the distance between my bungalow and that of my host being covered in a quarter of an hour in fair weather. In spite of the wet and cold I could not help laughing at myself when wading through mud in dress-pumps, with a carriage-lamp held aloft endeavouring to make out what was written on the various sign-posts. On several occasions the horse stood still, refusing to move, but here he only showed his great sagacity, for it was invariably found that he was within a foot or so of a stone wall, tree, or some other obstacle.

Madame Blavatzky is wanted up here. Not by by the police, but in order that she may exercise her powers in occult phenomena. A well-known and most popular lady has lost a favourite shawl. It appears to have been the old story—the umbrella-trick,—for an inferior shawl of somewhat the same colour was found in its place. Now, here is a chance for Madame Blavatzky. She no doubt would be able to find it in a strawberry-bed or potato-plot. But I am sceptical, I am sorry to say, and, like Hotspur, who, in reply to Glendower's "I can call spirits from the vasty deep," says—

"Why, so can I, or so can any man.
But will they come when you do call for them?"

As the carpenter says, "I doubt it.' But joking aside, this shawl business is still a mystery.

There is now a general rush for phætons and tongas, and those who postponed their departure till presumably the latest date are sorry they did so. But this change was so sudden and altogether unexpected. We all looked forward to another week or ten days of fine weather, with its accompaniments of riding and walking parties, pic-nics, lawn-tennis, and badminton matches. The new moon, too, was hailed with delight; but alas! of what use are her silvery beams to us now? It is little satisfaction to think that "*behind the clouds* is the sun (or moon, as the case may be) still shining."

The wretched dawk ponies will have a hard time of it for the next fortnight. I am sorry to say that I noticed little or no improvement in their general condition, and the maimed, the halt, and the blind are all impressed for duty.

I am told that H. E. the Governor leaves this on the 12th instant.

COURTS MARTIAL.

At a General Court Martial assembled at Lucknow, on the 17th day of May 1881, Gunner Daniel Nolan, of the H. Battery, 6th Brigade, Royal Artillery, was arraigned on the following charges:—Having, at Lucknow, on or about the twenty-ninth (29th) day of April 1881, made away with the following articles of his clothing, namely, one (1) pair of Wellington boots; conduct to the prejudice of good order and military discipline, in having, at Lucknow, on or about the thirtieth (30th) day of April 1881, when a sentinel over the Royal Artillery Canteen, loitered on his post, and stood at the door of the Non-commissioned Officers' Room and asked Acting Bombardier William Curtis, of the Royal Artillery, to supply him with rum; having, at Lucknow, on or about the second (2nd) day of May 1881, struck in the face with his clenched fist his superior officer, in the execution of his office, Acting Bombardier William Curtis, of the Royal Artillery. The Court found the prisoner guilty, and sentenced him to suffer penal servitude for the term of five (5) years, and in addition to be put under stoppages of pay, until he shall have made good the following article, namely, one (1) pair of Wellington boots.

At a General Court Martial assembled at Lucknow, on the 17th day of May 1881, Driver George Govier, of F Battery, 4th Brigade, Royal Artillery, was arraigned on the following charges:—Having, in the military prison at Lucknow, on or about the thirtieth (30th) day of April 1881, disobeyed, in such a manner as to show a wilful defiance of authority, the lawful command, "right about turn," given to him personally by his superior officer, in the execution of his office, Provisional Lance Corporal Robert Jones, of the 33rd Regiment, a warder in the said military prison, by not turning to the right about, having, in the military prison at Lucknow, on or about the first (1st) day of May 1881, disobeyed, in such a manner as to show a wilful defiance of authority, the lawful command "close and bolt your door," given to him personally by his superior officer, in the execution of his office, Provisional Lance Corporal Robert Jones, of the 33rd Regiment, a warder in the said military prison, by not closing and bolting the door of his cell, having, in the military prison at Lucknow, on or about the fourth (4th) day of May 1881, repeatedly struck in the face with his clenched fist, his superior officer, in the execution of his office, Provisional Lance Corporal Robert Jones, of the 33rd Regiment, a warder in the said military prison. The Court found the prisoner, guilty of all the charges, and sentenced him to suffer penal servitude for the term of ten (10) years.

I have published several well-confirmed cases of *Phthisis pulmonalis*, one of which, with the complete destruction of one of the lungs, cured by the use of Dusart's Wine and syrup, together with raw meat as food.—Dr. Delesenne, of the Paris Faculty.

THE WISTOW HALL STEAMER IN A CYCLONE.

The Hall Line steamer Wistow Hall, which left Liverpool on the 9th May, arrived here on Saturday at noon. She had moderate weather until she passed Aden. When within 505 miles of Bombay she encountered a very severe cyclone with tremendous seas, which completely buried the steamer, washing away one life and four cubbers, and doing other damages about the deck. The barometer during the gale was 29·20. Notwithstanding the rough weather, the Wistow Hall, made the passage from Liverpool in 25 days and 19 hours, including all stoppages.

THE KING OF THE HAWAIIAN ISLANDS.

Bombay is at present honoured with the presence of the King of the Hawaiian Islands, who arrived here very quietly two or three days ago. His Majesty left Calcutta on Monday, reached Benares the next day, remained there for the night, and left for Bombay on the following morning. He had intended to visit Agra, but on account of the great heat he changed his plans, and came direct to Bombay. By the King's express wish no formalities have attended his tour in this country, and he is living like a private gentleman at Watson's Hotel. King Kalakua is a tall, handsome, and powerful man, about 46 years of age, and delights in all kinds of athletic sports. He speaks admirable English, is a capital musician, and composes both music and poetry. He is, we are informed, much beloved by his people, whose welfare he has greatly at heart. He and his household are members of the English Episcopalion church. His object in travelling far and wide is to gain experience of the various forms of government and the industries of other countries, so that he may be able the more beneficially to rule his own subjects. His Majesty is accompanied by Colonel Armstrong, Commissioner for Emigration, Colonel Judd, Private Secretary, and Baron Robert Von Olhaffen, Equerry-in-waiting. King Kalakua left his kingdom in January last, and has since visited San Francisco, Japan, China, Siam, Burmah, and the Straits Settlements.

King Kalakua drove on Friday evening to Malabar Hill, and was delighted with the view obtained there. He also visited the Docks, and early on Saturday morning he paid a visit to some of the large horse establishments and inspected a number of Arabs. The original stock of horses brought to the Sandwich Islands has, it appears, greatly deteriorated during the past thirty years, although they still possess considerable power of endurance. The King is very much interested in horse-breeding, and has lately paid a good deal of attention to the improvement of the breed in his islands. He believes thoroughly, he says, in the stock known in America as the Hamiltonian and also in Arabs, and it is probable that before his return he will purchase some of the latter, for that breed crossed with the native stock produces remarkably fine animals. His Majesty is also paying special attention to the fruits, plants, and shrubs of India, with a view to the introduction of some of them into his own country. Mangoes are very plentiful in the Hawaiian Islands, but they bear no comparison whatever with those of Bombay. King Kalakua finds his own mangoes to be very much inferior in quality, and he hopes to introduce the Bombay mango into his country.

King Kalakua has greatly enjoyed his visit to India. He was much pleased with the courteous manner in which he was received and entertained by the Government officers at Calcutta, and his wishes as to the privacy of his visit have been carefully regarded. He was much struck with the irrigation works in this country, particularly as in his own islands the question of irrigation has become one of great importance. Works constructed by American Engineers are now being carried out in various parts of the islands. They are similar to those in this country, although by no means so costly or on so large a scale. His Majesty, who knows something of agriculture, was surprised to see the good crops the land yielded after so many centuries of cultivation, and he is of opinion that with a proper system of manuring, &c., the yield might be doubled.

The islands over which His Majesty rules form by no means an insignificant kingdom. They are specially important from their geographical position, as they lie nearly in the centre of the Pacific Ocean, and a vessel crossing from one great country to another must run close to the group. There is a monthly mail service from America to Australia, and the vessels call at the islands. There are also a number of sailing vessels which trade between the Sandwich group and California, as well as lines of packets from the United States and Europe. The trade is largely in the hands of Americans owing to the treaty which has been in force for two consecutive years between the two countries, and the opening of a Darien Canal or the construction of a ship railway across the isthmus of Tehuantepec would make the islands far more important than they are at present. We are informed that they now afford good opportunities for enterprising men in the way of sugarcane cultivation, which for the last few years has been very profitable. A number of young Englishmen, some with means and some without, have of late entered upon the cultivation of the sugarcane, and have been very successful. The labour is principally Chinese, although Hawaiians are still employed, but their numbers are not large enough to meet the demand. Their labour is superior to that of the Chinese in many respects. The foreign population is made up mainly of English and Americans, and numbers about 3,000. One advantage which these islands have from Europeans over countries like India, the Straits Settlements, and other British Colonies in this part of the world is that those who go there are able to become settlers, and generally do so, owing to the great salubrity, of the climate. It is said by the many travellers who have written on the subject that the climate has no equal in the world. European children thrive there, although they may not be so robust as children reared in cold climates. Although the temperature ranges from 85 to 88 in the summer, the air is constantly stirred by the strong trade winds. With regard to education, while great progress has been made in some of the higher branches, the European population is not numerous enough to maintain a thoroughly good system. The children of European parents are in general educated either in the United States or in Europe. A large proportion of them, however, return and become Hawaiian citizens. The fact that Europeans are taking up a permanent residence in the island, presents an interesting problem, as to the effects which the really tropical climate will have on the European constitution. If the northern races deteriorate in a climate like that of the Hawaiian Islands it will go far to settle the question whether European races can or cannot flourish in a tropical region, but of course any definite result cannot be arrived at until several generations have passed away.

Although one member of this group of islands was seen by Gaetano in 1542, the islands cannot be said to have been discovered till Cook visited them in 1778. The great navigator treated the natives very badly, and it was the direct causes of the brawl in which he met his death in Kealakeakua Bay in 1779. In early times each island had a King, but under Kamehameha I. they were formed into one kingdom. This King, writing to George III., August 6, 1810, desired formally to acknowledge the King of England as his sovereign, and to place the islands under British protection and his offer was accepted. This King died in 1819, and was succeeded by Liholiho, in whose reign idolatry was abolished simultaneously throughout all the islands. The first Christians who visited the islands were Cook and his followers. Vancouver in 1794 made attempts to enlighten the natives, and the King and his Chiefs requested him to send out religious teachers to them from England; but the first missionaries that visited the islands came from America in 1820. The natives then were without a religion of any kind. In 1819 and 1820, the whole nation destroyed idols, temples, and the furniture of idolatry, but Christianity had not then even approached the islands. The nation had voluntarily cast off the religion of their ancestors, and did not for some time adopt any other. The American missionaries arrived in 1820, and in less than forty years they taught the whole Hawaiian people Christianity as well as how to read and write, to cipher and to sew. Kamehameha II. and his queen visited England, and after a short residence there both died in London, July 1824. Prior to the year 1838, the Government was a despotism; but in 1840, the King, Kamehameha III., granted a Constitution, consisting of King, assembly of nobles, and a representative council. This Constitution, based on that of Great Britain, has in more recent times been much matured and improved. In 1843, the independence of the Hawaiian Kingdom was formally declared by the French and English Governments. Kamehameha IV. ascended to the throne in 1854, and after a brief but useful reign died in November 1863, and was succeeded by his brother, Kamehameha V. On his death, Lunalilo was elected in January 1873. He, too, died after a reign of thirteen months, and the choice then fell on Kalakua. Shortly after his accession King Kalakau visited the United States, where he entered into a reciprocal commercial treaty with that power and this has been the means of greatly enriching his kingdom.

Dr. de Jongh's Light-Brown Cod Liver Oil.—Pre-eminently the Cod Liver Oil for use in India and in warm climates. Joseph J. Pope, Esq., late Staff-Surgeon, Army, writes:—"I found during my Indian experience that the worth and character of Dr. de Jongh's Light-Brown Cod Liver Oil remained unchanged by tropical heat or foreign climate, and it was, from its uniformity of character, particularly adapted for long-continued administration. The Oil of Dr. de Jongh places in every one's reach a reliable and valuable remedy, one that cannot be too widely recognised." Sold only in capsuled Imperial Half-pints, Pints, and Quarts, by all chemists, druggists, and storekeepers. Sole Consignees, Ansar, Harford and Co., 77, Strand, London.

BOMBAY.

Vessels Arrived.—The following vessels arrived on Friday last:—Eshcol (s) and Exporter, from Cardiff; Tebe (s), Trieste; Iris, Liverpool; British Crown, Mauritius. On Saturday last:—Burmah (s), from Karrachee; Wistow Hall (s), Queen Cliff and Hindustan, Liverpool; Nyanga (s), Zanzibar. Yesterday:—Brinkburn (s), from Cardiff; Mercedes (s), put back from sea; Braidwood, Liverpool.

Vessels Sailed.—The following vessels sailed on Saturday last:—Sirdhana (s) and Ellora (s), to Calcutta; Titania (s), Clan MacLean (s), and Catherstone (s), Marseilles; Clan Fraser (s), Liverpool; Bijoulla (s), Rangoon. Yesterday:—H. Bolcow (s), to Persian Gulf; Vorwaerts (s), Trieste.

Prince's Dock.—The s.s. Peer of the Realm and the Wistow Hall entered, and the Ellora and the Rohilla left, the dock on Friday last.

Assault.—Govind Kalloo was on Saturday last fined Rs. 5 by Mr. Dosabhoy Framjee for assaulting Cassoo Ragoo with a bottle.

The Elphinstone Theatre.—It will be seen by an advertisement in another column that Professor Ruchwaldy will give an entertainment at this place this evening.

Lost or Stolen.—Mr. W. Lymot, residing at the the Byculla Hotel, reported to the police on Saturday last the loss of a gold watch by McCabe and a sum of Rs. 600 in currency notes, but under what circumstances he lost the said property he has not the remotest idea.

Regimental Sports at Neemuch.—The 1st Bombay Lancers were to hold an assault of arms at Neemuch on Friday and Saturday last, at which there were to be exhibitions of skill at tent-pegging, lime-cutting, sword and lance combats, wrestling, running, jumping, &c., &c.

Cruelty to Animals.—The following is a summary of cases prosecuted by the Agents of the S. P. C. A. during the week ending the 4th inst.:—Horses, 2 lame and 1 emaciated; bullocks, 23 lame, 96 sore necks, and 3 emaciated; 1 case of fowls suspended by the legs; total number of cases 122; amount of fines Rs. 274.

Arrival of a Nawab.—Nawab Khorsedjung Bahadoor, the eldest son of H. H. the Co-regent of Hyderabad, arrived here on Friday last. He is accompanied by one hundred followers, and has taken up his residence at the bungalow of the late Commander-in-Chief on the Nepean Sea Road, Malabar Hill.

Parsee Girls and English Education.—The *Rast Goftar* recommends that a large school be established for giving sound English education to Parsee girls. The paper is of opinion that the girls must keep pace with the boys, in order to prevent hereafter the formation of unequal matches, so far as education is concerned.

Collision in the Harbour.—Prow No. 3604, Hawa Bowajee Tindal, laden with coals belonging to the B. B. and C. I. Railway Company, was run down by the steam-ship Tavaine on Friday afternoon last off the middle ground while the steamer was going to sea and the prow was making for the Sassoon Dock. The prow sank immediately after the collision, and the crew were rescued by the steamer's boats.

Cholera at Surat.—Cholera is raging at Surat on a frightful scale. A correspondent of the *Jam-e-Jamshed* is afraid that the malady, if it continues much longer as it has done for the past few days, will devastate whole localities there. The worst afflicted parts are Nanpura and the camp, where the bulk of the inhabitants are Euorpeans and Parsees. Most of the officers in the camp have removed, and the deaths among Parsees are very numerous.

Illegal Possession of Property.—Krishna Jairam was on Saturday last convicted by Mr. Dosabhoy Framjee of having in his possession sundry gold and silver ornaments and wearing apparel, of the collective value of Rs. 475, reasonably suspected of having been stolen or fraudulently obtained, and failing to account satisfactorily how he became possessed of the same, being a reputed thief, he was sentenced to three months' rigorous imprisonment.

Triple Execution at Ahmednagar.—A correspondent writes that three persons, named Shaik Ahmed *alias* Sayed Ahmed, Gunpatwullud Babajee, and Mahataria wullud Sakharam, were executed at Ahmednagar on the morning of the 1st instant. The prisoners, accompanied by the jailor and a party of policemen, were led out of the jail and carried to the place of execution, about a mile and a half from the town, in carts, where an immense throng of natives assembled. The men were hanged in the presence of Mr. W. R. Hamilton, Magistrate, first class.

The Excelsior Opera Troupe.—On Saturday, at the Elphinstone Theatre, this company performed their new and interesting play entitled "Khooshro and Gulroo." The main incidents of the plot are borrowed from Shakspeare's "Romeo and Juliet.' The Company consists of Parsee and Mahomedan players. A Parsee youth performed Romeo (Khoosro) and a Mahomedan girl aspired to the character of Juliet (Gulroo). The pathetic and amorous songs, which the lovers interchanged, were much admired by the audience. The love-scene on the terrace between the aristocratic couple was placed in ludicrous contrast to the love-making of their servants below stairs. Most of the minor actors also acquitted themselves fairly well. The scenery, especially of the terrace "at the witching hour of night," was creditable. The play, which was preceded by a concert, was followed by a laughable farce. We must say that the efforts of the company to please are conformable to the taste of the native play-going public, and therefore deserve their liberal support.

Death of a Bengal School-master.—It is with deep regret that we have to announce the death at Belgaum yesterday (Friday) morning of Mr. John Aikin, Head Master of the Cantonment English School at that station. The deceased gentleman was our own Belgaum correspondent, and his letters, which appeared in these columns from time to time, were read with much interest. The late Mr. John Aikin was educated in the Panchgunny Institution, then under Mr. Brierly, and was well known and a general favorite amongst the several students in Poona. He was comparatively a young man, of good talents, and full of promise, and his early death is very sincerely felt. The late Mr. John Aikin died from remittent fever after a few days' illness.—*Deccan Herald.*

Accident to H. E. the Governor's Tonga at Mahableshwur.—A private letter, dated Mahableshur, the 2nd instant, informs us that as His Excellency Sir James Fergusson was returning from Mr. Campbell's residence, the "Blue Valley Hall," at 11 o'clock the previous night, the tonga somehow or other fell into a gutter near the Native Library, when His Excellency jumped out in time to prevent further mischief. Sir James was calling out for the police peons, but before any sepoys made their appearance, some of the servants of the firm of Messrs. Hajee Adam and Sons and the Mail Agent ran up and rendered the necessary assistance. The

A BOY KILLED BY SHARK.—We hear that at Ichapore, a few days ago, a native lad has his right leg bit off by a shark below the knee while bathing in the river and died within a few minutes of the occurence.—*Statesman.*

THE IMPERIAL SILVER-LEAD MINING CO.—Agreeably to a requisition of the Directors, an adjourned extraordinary general meeting of the Shareholders of the above Company was held on Monday last, at No. 7, Old Post Office Street, when there were present, in person or by proxy, Messrs. Pryce Jones, R. H. Stevens, A. G. Swinton, T. Lawson, J. L. Bridgnell, J. M. Bridgnell, J. C. Allen, R. Cave, C. E. Robinson, J. H. Devereux, and Baboos D. M. Doss, J. G. Shome, B. C. Bose, U. L. Ghose, S. S. Deb, A. Banerjee, and S. C. Roy. Baboo J. G. Shome, the managing director, was voted to the chair. The only important item of business before the meeting was with regard to Mr. Devereux's claim. After a long and desultory conversation, the following resolution was framed, and Mr. Devereux was requested to sign the same. He declined to do so, until he had consulted his legal advisers. The resolution ran as follows.—"In consequence of the misappropriation of the funds of the Company by Messrs. Archer, Levey & Co., the agents appointed by Mr. Devereux as vendor and promoter, and also to induce the shareholders to continue the work, and not to wind up the Company (as Mr. Devereux's shares give him the largest share in the dividend,) it is hereby agreed between the Company and Mr. Devereux that the latter will not be entitled to claim any dividend, till the amount, misappropriated by Messrs. Archer, Levey & Co., is recouped to the Company, with interest at 10 per cent. per annum, out of the future dividends, and that he gives up his right to more votes than those possessed by the largest holder of shares in any meeting of the Company." The meeting was adjourned to Friday.—*Indian Daily News.*

OCCULT PHENOMENON.—The following story has been communicated to us, with an assurance of its authenticity:—A girl of 14 or 15 years of age living in the northern quarter of Calcutta, of a social disposition, and full of health, suddenly lost all her vivacity, mirthfulness, appetite, power of speech, and understanding, and remained eleven days continually uttering the most fearful groans night and day, with her head resting on her hand, refusing every kind of food that was given her, and living upon small quantities of water. Even in the early stage of her disorder some elderly men and women suspected her of being possessed by the devil, but this was laughed at an passed unheeded for some days, till a doctor of necromancy, a carpenter, residing in Badoor Bazan, was called in, and he gave, as his opinion that the illness of the girl was really caused by her being possessed by the devil. The girl was cured in two days under his treatment, or rather the joint treatment of himself and another who was brought in on the second day. On the first day, as soon as the doctor entered the threshold of the house, at 8 p.m., the girl, who was in a room on the second storey of the house in the inner apartment, without knowing anything about the arrival of the doctor, uttered a dreadful cry, which was heard at a considerable distance from the house. The incantations of the first night were without any visible effect. The mysterious operations of the second night, however, resulted in the complete dislodgment of the ghost, who confessed to be of the Chundal caste, and declared that it had lived in the immediate neighbourhood of the house for a number of years occupying the *ashood* tree standing in the compound of the public night-soil depot at Amherst-street, and that the girl frequently coming near the tree, it was tempted to have her as its own. The tree stands only at a few yards' distance from the garden attached to her house which has a tank in it, used by the women of the family for the purpose of bathing, &c. Like the medium in spiritualism, the girl spoke for the ghost, and, when authoritatively ordered to do so, wrote the ghost's name and that of his father in Bengali, though she was never taught and never knew an alphabet of the language. This and many other wonderful things were performed before a large gathering of men and women, who preserved the utmost order, quietness, and attention throughout, and were on their perfect guard against any deception. The girl is doing well, but very much emaciated.—*Statesman.*

MADRAS.

DEATHS IN MADRAS.—From the 21st to the 27th ultimo, 5 Europeans, 8 East Indians, 11 Native Christians, 190 Hindoos, and 32 Mahomedans died in Madras, making a total of 246 persons. The average of the corresponding week for the ten previous years was 253. The deaths are thus classified; 36 from small-pox, 7 from measles, 60 from fever, 16 from dysentery, 6 from diarrhœa, and 121 from other diseases. The population, according to the last census, being 397,552, the death-rate in the week under notice was at the rate of 32·1 per 1,000 per annum. The mean of the ten previous years was 33·2 per 1,000 per annum.

THE LATE T. G. CLARKE.—Much regret will be felt at the announcement of the death of Mr. T. G. Clarke, for many years Senior Presidency Magistrate of the Town of Madras. This sad event has not been unexpected, for Mr. Clarke had been ill for many days; and, considering his advanced age, and the serious nature of his illness, very little hope was felt of his recovery. In 1879, he was laid up with a carbuncle, and it was owing to Dr. Mohideen Sheriff's constant care and medical attention that he was brought round. Since then he has never been as hale and hearty as he was when, as the "Great Tee Gee," he presided at the Town Presidency Magistrate's Court. Old age had worked upon a constitution already broken down by constant attendance to duty, in a climate like that of Madras.—*Mail.*

MILITARY MATRIMONIAL DIFFICULTIES.—We hear that the Commandant of Queen's Own Sappers and Miners is averse to granting the men of the Royal Engineers under his command permission to marry, although His Excellency the Commander-in-Chief has on the representation of a "sufferer" who preferred marriage to "single blessedness" (?), issued an order to the effect that the regulation which applied to all European Corps in the Presidency in regard to this matter, did not hold good in the cases of men of the Royal Engineers, who had free permission to marry whenever they liked. We would not have aired this affair but for the fact that the Commandant of the Sappers has not accorded this order that acquiescence to which it seems fully entitled, in other words the Commandant has in a certain case refused to grant the necessary permission and although the father of the young man has mildly expostulated on more than one occasion the Commandant still remains inflexible.—*Bangalore Examiner.*

AN OFFICER CHARGED WITH ASSAULT.—Last Monday Sub-Lieutenant Sullivan of H. M.'s 67th Regiment appeared before Major Maltby the Senior Cantonment Magistrate of Bangalore, in answer to a summons charging him with assaulting a native employed as a billiard marker in the Mess of the Regiment. Accused admitted the assault but said he had committed it under provocation. Lieutenant Hight, of the same Regiment, said that he was present in the Mess on the morning of the assault. He saw Lieut. Sullivan strike complainant on the knuckles with a cue because he (complainant) refused to mark when told to do so repeatedly. Lieut. Sullivan also struck complainant a blow on the face, which caused his nose to bleed; but the blow was 'a slight affair' and was not dealt 'particularly hard.' Cross-examined by accused, witness said the present was not the only occasion on which complainant was insolent. His Honour convicted Lieut. Sullivan of assault and fined him Rs. 5 and costs As. 12 remarking that if complainant was insolent, it was Lieut. Sullivan's duty to have reported the matter to the Mess President. Complainant was informed by the Court that he would not be awarded any compensation, as he did not merit it from the fact that he had himself provoked the assault by a failure of duty.—*Bangalore Examiner.*

N.-W. PROVINCES, PUNJAB, AND OUDH.

SIMLA.—In proof of the badness of the times, we are told that Harding's Bachelor Hotel is nearly empty, and Mr. Staten is anxious to dispose of his well-known establishment by raffle, if Mr. Whitley Stokes will only have a special Act passed through the Council to legalise the undertaking.—*Pioneer.*

VALUABLE DISCOVERY FOR THE HAIR.—If your hair is turning grey or white, or falling off, use "The Mexican Hair Renewer," for it *will positively restore in every case Grey or White hair* to its original colour, without leaving the disagreeable smell of most "Restorers." It makes the hair charmingly beautiful, as well as promoting the growth of the hair on bald spots, where the glands are not decayed. Ask your Chemist for "THE MEXICAN HAIR RENEWER," sold by Chemists and Perfumers everywhere at 3s. 6d per Bottle. Sold wholesale by the Anglo-American Drug Co., Limited, 33, Farringdon Road, London.
